DETAILED ACTION

Status of Claims

1. Applicant's response filed 12/05/2007 to the Office Action mailed 8/09/2007 is acknowledged. Applicant canceled Claim 4, amended Claims 1-3, and presented arguments in response to the prior Office Action.
2. Applicant's Information Disclosure Statement, filed 8/15/2007, is acknowledged and has been reviewed. Only the English translation of the abstract for foreign patent document RU2145895 was considered. The previous Office Action acknowledged the IDS submitted on 6/22/2006, but did not consider the citation to Japanese Patent No. 51-34151. This citation is presently acknowledged and its degree of relevance to the instant application, as found by the WIPO examining authority, has been considered. See Applicant's arguments, page 10, paragraphs titled "Information Disclosure Statement".
3. Claims 1-3 are pending and presently under consideration.
4. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.
5. Claims 2 and 3 appear to be free of the art.

Specification

6. The Abstract of the disclosure is objected to because it is not descriptive of the elected invention. The Abstract should be between 50 and 150 words in length and should provide a description of the elected invention; i.e., the instant abstract should specify a method of treatment of severe aphasia as a result of cerebrovascular accident in patients suffering from said aphasia for at least three years.

Claim Rejections - 35 USC § 102

7. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

8. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Huber, W. (Pharmacopsychiatry, 1999).

Huber teaches the administration of 2-oxo-1-pyrrolidineacetamide (piracetam) in the treatment of acute and chronic aphasia following stroke. See Abstract, page 38. The administration of a compound to a patient would encompass an acceptable carrier to deliver said compound to said patient. The carrier can be as simple as water.

It is noted that intended use confers no patentable weight to composition claims. *In re Hack*, 114 USPQ 161.

Conclusion

9. Claim 1 is rejected.

Art Unit: 1611

10. Claims 2 and 3 are objected to because they depend from a rejected claim (Claim 1). It is suggested that the claims be rewritten in independent form including all of the limitations of the rejected claim.

11. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
